The greatest satisfaction is to receive calls and e-mails from all over the world and to know that, even today, exactly 40 years later, many athletes remember the Six Days of 1981 as the most beautiful race they have ever played. It is true, some of the paths of that edition are no longer available, but the paths identified will not be outdone. The expectation is growing and the work of our team is growing: soon, we will present the official poster of this first edition of the FIM Enduro Vintage Trophy. In the meantime, warm up the engines!"
